

Icon series

ICON is defined as a significant piece of art, artifact, person, place or thing that is held in high regard. The ICON Series certainly achieves that status. Designed by John Stafford and Chris Carter, this exciting series delivers sculp-

tured sophistication, elegance, ergonomics and pizzazz! From the first time you look at this incredible eye catching seating group with its unique profile to the sleek cast aluminum parts and tapered appearance you know it is special. ICON

is available in executive, management and guest seating. Each chair version now comes with two arm options. The fixed urethane and aluminum arm version is ideal for executive and conference use and the adjustable T-arms are

perfect for the multi-tasking executive or manager. The sled base guest chair compliments this popular series.

ICON is now available in two distinctly unique upholstery versions, Icon and the new Icon Ultra. The ICON and its wafer style cushions are made with plush Ultrafoam® and soft fiberfill to provide maximum comfort. ICON utilizes a wrap

over type cushion and headrest which is at home in a variety of office and conference settings. ICON Ultra's upholstery option exaggerates thick-to-thin tapers throughout the back and headrest to provide an ultra sleek

appearance. ICON Ultra's integrated angular shaped headrest adds a design element as it goes from thick-to-thin and blends neatly into the back cushion. The ICON Ultra is very sleek in appearance as it is just under two inches thick from

the inside back to the outside back. ICON Ultra provides a crisp waterfall seat front that provides the end user support while allowing proper circulation and increased comfort.

Icon series

ICON's sculptured aluminum back strap is both functional and aesthetic. Uniquely shaped urethane over steel arms with angled connection points and aluminum receivers located underneath the seat compliments the sculp-

tured back strap. The tapered tuxedo back gives ICON a tailored classic look. The ergonomic design and a waterfall seat provide comfort and reduce fatigue. ICON's inner seat consists of 1" of polyester fiberfill material over 2"

of high resilient molded Ultrafoam® for a comfortable seating experience. High profile aluminum or nylon version bases add to the beauty of the ICON series. Knee tilt mechanism with multi position lock-out feature is standard.

Management Chair

ICON features seven-ply high density multi-contoured plywood seats and backs on all versions. The guest chair frame consist of one and one quarter inch diameter by sixteen gauge and one inch by fourteen gauge steel tubing with all weld-

ed joints. Arm brackets and back bar consist of polished 380 Alloy Aluminum for strength and beauty. The Icon & Icon Ultra jury chairs are available with a tension adjustable mechanism and is standard with a self returning

feature. This feature allows the user to turn while seated, upon exiting the jury mechanism automatically returns to its original forward position. All jury chairs come with a floor mount base and are not free standing.

Icon Ultra series

ICON Ultra's upholstery option exaggerates thick-to-thin tapers throughout the back and arms which gives the product a sense of motion visually. ICON Ultra has a uniquely shaped crisp

waterfall seat that gives support while allowing correct blood circulation via molded Ultrafoam®. The Icon Ultra features an integrated headrest with ergonomic angular shapes. Ergonomic back

shape and the waterfall seat promotes comfort and reduces fatigue. The Icon Ultra is designed with seven-ply high density multi contoured plywood seats and backs.
